

## **Requirements after listing**

Post-listing requirements for Main Board: Half-year interim results need to be reviewed by either the auditors or the audit committee and published within three months from the interim date. Full-year results need to be audited and published within four months from the year-end date. There is no exemption from the filing deadline.

Post-listing requirements for GEM: quarterly and half-yearly unaudited results must be published within 45 days from that period-end, while the full-year results need to be audited within 90 days from the year-end date. For the first two years after listing, when the company announces its half-year and full-year results, the actual result must be compared with the planned milestones set out in the prospectus. Again, there is no exemption from the deadline.
